Car

VCI Connection

For Android devices, tap Bluetooth icon near the top right of the Home screen under iSmartDiag app. For the iOS devices, tap Setting > Bluetooth on your iOS device to open the Bluetooth function. Then tap the Bluetooth icon under iSmartDiag app on the screen to pair it with the device. The Bluetooth name starts with VD.

- Ensure your device's Bluetooth is turned on.
- When the device is successfully paired with the dongle, the Bluetooth icon on the iSmartDiag app will turn to green.

8

Finish Installation

- Your iSmartDiag scan tool dongle is now ready for use.

UPDATE

Software: The diagnostic software can be downloaded through Management > Update. When a new version is available, an Update button will display. Tap the button to update the software.

VCI Firmware: Tap Setting > VCI Management > VCI UPGRADE to update the firmware if a new version is available.

PRINT

1.For iOS devices, the saved report can be printed via the Print function on the device.

2.For Android devices, download and install a third-party Print app to print the saved report.

NOTE: The device needs to be connected with a printer to print.
